

**Attachment 3: New Release B L4s links to Release B RBRs for addition to MAIN**

This attachment provides the list of Release B L4 requirement links to Release B RBRs that are to be added to the RTM MAIN Release\_to\_L4 class. These links replace the links deleted when the requirements listed in Attachment 1 were deleted. It should be applied automatically after the application of Attachment 2.

Note that these links largely reflect the content of Appendices B and C of the Release B 304 document. However, some minor changes and corrections were applied to the Release B RTM database following the issue of the 304 document. This list is not therefore identical to the content of DID 304.
