

ATTACHMENT B: CCR Deltas Between Version C and Version D of CCR-96-0303.

Further analysis of this CCR as it nears implementation showed that there were discrepancies in the link table which mapped RBRs to Level_4s.

An oversight of the removal of PGS-0458#A from the mapping presented in the Link Tables of Version C is removed in this Version (D).

The list of Toolkit Level 4s that follows are found to have no corresponding text or attributes in the Auto-load tables which describe the Level_4s.

S-TKD-00520
S-TKD-01265
S-TKD-01501
S-TKS-00520
S-TKS-01265
S-TKS-01501

These Level_4s are removed. Further research should be performed to resolve the question of their status.

The removal of these discrepancies will allow the implementation of the Toolkit requirements into the RTM database.
