the a Data notification is notification ing routine re the data re by which optionally dated and for late to the	SCF-0210#A	5939	The ECS shall have the capability to send a Data Quality Request Notification to the SCF. This notification is sent when QA notification criteria are met during routine ECS processing. The notification states the data product and the time by which a notification, and optionally data, must be evaluated and returned to the ECS for inclusion as an update to the product metadata.	This notification is an action to be taken by ECS after the occurrence of a triggering event per a subscription that the SCF had previously entered. SCFs no longer have a time limit by which they must complete their QA of science data, but the metadata will reflect the lack or presence of the QA.
