

Table 1: Modify Level 4 Requirement Text

LEVEL_4	PARAGRAPH_ID	OBJECT_ID	RELEASE	TEXT	CLARIFICATION	REQ_TYPE	REQ_STATUSES	VERIFICATION_METHOD	VERIFICATION_STATUS	CCR
CC	F-ANA-07120	13503	B	The FOS shall use predicated spacecraft data as input to the RDD algorithm.	The FOS shall allow for the use of different predicted spacecraft delay data depending on the selected downlink data rate (e.g., 1Kbps, 16 Kbps).	functional	approved	analysis	unverified	97-0967
CT	F-ANA-07120			The FOS shall use predicated spacecraft <u>ranging</u> data as input to the RDD algorithm.	<u>Predicted spacecraft ranging data is provided by FDD. The FOS must convert the TDRS IDs in the FDD ranging data (TD1, TD3, etc.) to correspond to the actual TDRS ID (TDE, TDW, etc.) as determined in ground telemetry.</u>
