

Table 1: Modify Level 4 Clarification Text

LEVEL_4	PARAGRAPH_ID	OBJECT_ID	RELEASE	TEXT	CLARIFICATION	REQ_TYP	REQ_STA	VERIFICATION_METHOD	VERIFICATIO	CCR
CC	F-TLM-01315	1405	B	The FOS shall use analog telemetry values, discrete telemetry values, constants, or other derived parameters to build new derived parameters.	The FOS telemetry data base will limit the number of input parameters for each derived parameter equation to six (6). The maximum number of derived parameters that may be processed at any given time will be determined for each mission.	functional		demo		
CT	F-TLM-01315				The requirement should be tested to verify that up to 60 input parameters can be supported for a derived parameter equation.		approved		unverified
